9505935 11/03/05-File Update by Sun: A stipulation Agreement was
mailed to Mssrs. Constantine and Peter D'Arco of King David
Enterprises Inc.on 11/03/05 and required to be signed and returned by
11/25/05. (Sun) 11/18/05-File Update by Sun: Final New Order of
Consent was sent to Howard D. Stave, Esq. (Attorney for Northland)
on 11/15/05. (Sun) 12/27/05-File Update by Sun: On 12/27/05, Sun sent
a letter to the property owner (Yuval Sniatekewic of King David
Enterprises, Inc. 718-496-9595) approving the subsurface
investigation work plan, prepared by his Consultant, Hydro Tech
Environmental, Corp., with the following conditions: 1)for each
boring/well, two soil samples shall be taken, including the deepest

Map ID

EPA ID Number

dry soil sample and the sample with the highest PID reading and shall be sent for EPA Method 8260/8270 analyses. 2) One additional monitoring well (MW-4) shall be installed along the eastern property boundary, since the highest concentration of soil end point samples was detected in east sidewall of excavation in accordance to analytical data of Site Assessment for PBS performed by Yellowstone Industries, Inc., dated 12/01/97. (Sun) 03/14/06-On 02/14/06, Sun received an Investigation Summary Report dated 02/13/06 from Hydro Tech Environmental Corp. The report has four monitoring wells which are totally deviated from the locations proposed in the investigation work plan approved by DEC on 01/10/06. Sun called Hydro Tech and informed them that DEC disapproves their report. A joint site inspection is set for 03/17/06. (Sun) 03/17/06- Sun conducted a site visit and met Hydro Tech Manager, Mark Robbins and Their President, Mostafa El Shamy at the site. It was agreed that due to site condition, one additional well will be installed on the sidewalk at the corner of Cropsey Avenue and Bay 54th Street. (Sun) 03/23/06- On 03/23/06, Sun sent the following letter to the property owner and cc'd to Hudro Tech: The New York State Department of Environmental Conservation (Department) has received and reviewed the subsurface Investigation Report dated February 13, 3006 and received February 24, 2006 for this site. The Department requires installation of one additional well installed on the sidewalk at the corner of Cropsey Avenue and Bay 54th Street. The soil will be sampled continuously with a PID. The deepest dry soil sample and the sample with the highest PID reading in each boring/well will be sent for EPA Method 8260/8270 analyses and the results will be sent to the Department. If no PID readings are exhibited, then the soil sample will be taken from immediately above the water table. A groundwater sample will be obtained at each well location and submitted for EPA Method 8260 & 8270 analysis. A revised investigation summary report must be submitted to the Department by May 23, 2006. Prior to initiating this work, all subsurface utilities in the area must be clearly identified and marked out. (Sun) 05/08/06-File update by Sun: Based on the letter report dated April 21, 2006 and per DEC's requirements, one additional soil probe and monitoring well were installed in the sidewalk at the southeast corner of the property, to the southeast of the existing tanks. A review of the soil analytical results indicates that no individual VOCs or SVOCs are present at concentrations exceeding their respective Recommended Soil Cleanup Objective (RSCO). Furthermore, the total VOC ans SVOC concentrations also do not exceed their respective RSCO. A review of the groundwater analytical result indicates that no individual VOCs or SVOCs are present at concentrations exceeding their respective Groundwater Quality Standard. The results of the additional sampling indicate that no petroleum constituents are present in the southeast portion of the Site at concentrations exceeding applicable regulatory standards. Based upon these findings, along with the prior findings of Hydro Teck's subsurface investigation, the spill number, 97-08475, is closed. (Sun) "

Remarks:

"SOIL CONTAMINATION FOUND DURING REMOVAL OF UNDERGROUND STORAGE TANKS. APPROXIMATELY 400 YARDS OF SOIL BEING STOCKPILED."
